

The Ultimate Pastry, Savory & Beverage  
Ingredient Manufacturing Company

Thank you for your interest in Amoretti ingredients.

Below are the formulations you will need when sampling our products. Please refer to each item for the recommended use level.

### **COMPOUND Formulation** (Use levels 3-5%)

---

**Applied at a 5% use level:** Take the batch weight and divide it by 0.95, which equals the total finished & flavored batch weight.

**Example:** 1lb unflavored batch weight  $\div$  by 0.95 = 1.05 lbs. total batch.  
Therefore, if you have 1 lb unflavored batter, and the total batch weight should be 1.05, you need to add 0.05 lbs of the Amoretti compound.

**Applied at a 4% use level:** Take the batch weight and divide it by 0.96, which equals the total finished & flavored batch weight.

**Example:** 1lb unflavored batch weight  $\div$  by 0.96 = 1.04 lbs. total batch.  
Therefore, if you have 1 lb unflavored batter, and the total batch weight should be 1.04, you need to add 0.04 lbs of the Amoretti compound.

**Applied at a 3% use level:** Take the batch weight and divide it by 0.97, which equals the total finished & flavored batch weight.

**Example:** 1lb unflavored batch weight  $\div$  by 0.97 = 1.03 lbs. total batch.  
Therefore, if you have 1 lb unflavored batter, and the total batch weight should be 1.03, you need to add 0.03 lbs of the Amoretti compound.

### **EXTRACT Formulation** (Use level usually 1%)

---

**Applied at a 1% use level:** Take the batch weight and divide it by 0.99, which equals the total finished & flavored batch weight.

**Example:** 1lb unflavored batch weight  $\div$  by 0.99 = 1.01 lbs. total batch.  
Therefore, if you have 1 lb unflavored batter, and the total batch weight should be 1.01, you need to add 0.01 lbs of the Amoretti compound.
